

VACANCY FOR A CONSULTANT LOGISTICS AUTOMATION – IMPLEMENTATION SPECIALIST

About Groenewout

Groenewout is a leading logistics consultancy firm focused on the development and implementation of logistics and supply chain operations. Our customers range from medium-sized enterprises to multinationals. We are active throughout the whole of Europe, although a significant proportion of our projects are connected to the Benelux region. Our offices are in Breda. For more details of our areas of specialization and for references, please see our website: www.groenewout.com.

About the Role

As a **Logistics Automation Consultant** at Groenewout, you will be responsible for supporting the customer during the **design & implementation of logistics automation projects** from the tender until go-live. With a background in **Mechanical Engineering** and a strong affinity for logistics, you will oversee the functional design and execution of **AS/RS systems, AutoStore solutions, conveyor systems, and packaging lines**, ensuring a seamless transition from concept to operation.

Key Responsibilities

- **Lead the implementation** of logistics automation projects, starting from design to the **tender process** with different suppliers.
- Translate conceptual designs and feasibility studies into **detailed engineering**.
- **Coordinate with suppliers, IT teams, and operational staff** to ensure alignment on system specifications and integration.
- Develop and document **test plans and acceptance criteria** for automated solutions.
- Oversee and execute **system testing**, including Site Acceptance Tests (SAT), technical availability tests, stress tests and operational ramp-up.
- Provide **hands-on support during implementation**, troubleshooting issues, and optimizing system performance.
- Ensure system compliance with **safety regulations**.

Your Profile

- A **self-starter** who likes to take ownership
- A **degree in Mechanical Engineering (or a related technical field)**.
- Strong affinity with **logistics and warehouse automation**.
- 1- 2 years of experience with **implementing automated logistics solutions**, such as **shuttles, AutoStore, conveyors, and packaging lines**.
- Hands-on experience with **tender processes, supplier coordination, and system testing**.
- A good command of Dutch and English, both verbally and in writing.
