

## Exclusive Insights into My Jewellery's Logistics Operations

In our previous newsletter, we introduced **My Jewellery's new distribution center**. Now, we're excited to invite you to experience their automated packing solution and their AMR Tote-to-Person system up close. Join us on **Wednesday, June 11**, for an **inspiring afternoon of logistics insights and high-level networking**. During this exclusive event, you'll get a behind-the-scenes tour of My Jewellery's cutting-edge distribution center in Den Bosch.

*"Discover how one of the industry's fastest-growing brands manages its operations, gain practical insights from logistics professionals, and connect with peers in a dynamic setting."*

-Alain Beerens, CEO Groenewout

## Unique new warehouse marks first step toward futureproof logistics for Coulisse

In 2024, **Coulisse opened a new warehouse in the Dutch town of Enter**—a major step in the company's ongoing growth and innovation strategy. What began in 1992 as a small trading company has since evolved into a global specialist in window coverings, known for its forward-thinking approach and design-driven solutions. To bring this vision to life, Coulisse partnered with **Groenewout**, initially commissioning a **feasibility study to validate the project**. Groenewout then supported the **selection of warehouse equipment and a new Warehouse Management System (WMS)**, and guided the project through to successful completion.

*"Groenewouts pragmatic, no-nonsense approach is a perfect fit with our own way of thinking and working. They listen closely, make suggestions and are flexible."*

- Operations Manager Rob Looman (l) and Supply Chain Director Thijs Prins

## Stijn Belt rejoined Groenewout as Director Customer Projects

Groenewout is proud to welcome back **Stijn Belt**, who has rejoined the consultancy as **Director Customer Projects – Construction Management & Engineering**. Stijn was previously with Groenewout from 2016 to 2022 and brings a deep understanding of both the company and the industry. **With over 20 years of management experience and a bachelor's degree in industrial engineering**, Stijn offers extensive expertise in construction management, safety and security systems, systems integration, and mechanical and electrical installation design.

*"Groenewout offered me the opportunity to help build an international organization and to further expand Groenewout's knowledge and network in construction and facility management in the Netherlands."*

- Stijn Belt, Director Customer Projects
