CONSULTING, ENGINEERING & OPTIMIZATION IN LOGISTICS NETWORKS

Join our knowledge session on May 6 at The ColdHub in Dordrecht

On **Wednesday, May 6**, we invite logistics professionals to an afternoon dedicated to knowledge sharing, practical insights, and exchange with experts from the field. The **event takes place in The ColdHub at B&S** and offers participants the opportunity to look behind the scenes of a highly specialized logistics environment.

The program includes:

- The latest technological developments in cold store logistics
- Key considerations when selecting the right system environment
- Practical experiences and lessons learned at The ColdHub
- Guided tour through The ColdHub cold store

A central part of the afternoon will be a guided visit through the **cold store facility (Dutch spoken)**, where technical solutions, operational requirements, and project experiences can be discussed directly on site. As the visit includes temperature-controlled areas, **participants are advised to bring a warm coat.**

[Join the session in Dordrecht!](#)

"Designing and building cold storage facilities is a delicate balance between logistics needs, building physics, regulatory compliance, and energy efficiency."

- Stijn Belt, Director CM&E

"The B&S tour offers a very concrete perspective on how logistics and construction come together as one in a state-of-the-art, temperature-controlled environment."

- Jan Willem Steenbergen, Associate Consultant

Looking Back: Supply Chain Innovations in Antwerp

On **March 19**, we took part in **Supply Chain Innovations in Antwerp**, where industry professionals discussed current developments in logistics and operations. Our focus was on **how artificial intelligence can support better decision-making in supply chain environments**, with conversations centered on practical use cases, realistic implementation paths, and measurable value in day-to-day operations. A clear takeaway from the event was that **growing interest in AI is matched by a strong need for direction**: many companies are looking for practical guidance on where to start, how to assess operational readiness, and which use cases create tangible value before moving into broader implementation.

60 Years of Groenewout Six decades of experience shaping what comes next

In 1966, the first steps were taken and the foundation was laid for what Groenewout represents today. Sixty years later, that foundation stands for **deep expertise in warehousing, transport and supply chain management**, built through continuous progress, long-term partnerships, and practical experience across a wide range of industries.

"Looking back on six decades also means recognizing how strongly logistics environments have evolved over time. Requirements have become more dynamic, technologies more interconnected, and decisions more complex. What has remained constant is the importance of combining experience with the ability to anticipate change."

- Alain Beerens, Branch Manager Groenewout
